

BACKER FAN HEATERS FOR TRAINS BFH-T

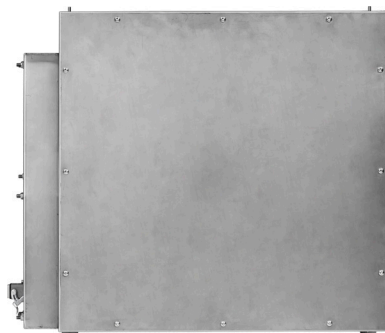

Description

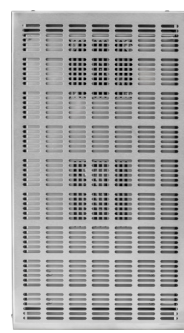

Backer Fan Heaters for Trains provide additional heat and supports a general heating system when it cannot manage to establish satisfactory comfort. These heaters offer an improved ambience for train personell in general and in different spaces more specifically, vestibules, driver cabins, toilets and catering/kitchens. The heaters never exceed 60°C and are designed with extra security layers to prevent incidents and vandalism. Moreover the Backer Fan Heaters for Trains require low maintenance and low LCC (Life Cycle Costs). They are made of 100% stainless steel which makes them extremely easy to clean. They can easily be placed in narrow spaces thanks to their compact and robust design.

Backer Vestibule Heater

Backer Catering Heater

Backer Toilet Heater

Backer Cabin Heater

Tubular Elements

BENEFITS

- Proven technology
- Low maintenance
- Low temperature
- Low LCC
- Durable

FIELDS OF APPLICATION

- Trains

Technical Specification

Material	EN1.4301/ AISI 304
Surface temp	Max 60°C and 100% working ratio
Design	Double or single insulated. Comply with: IPX4, EN 50155, BS6853, EN-IEC 60068, EN61000, EN61373
Power	500-1500W
Weight	5-12kg
Voltage	230V/50Hz
